

INDEPENDENT NON-PROFIT SCIENTIFIC RESEARCH ORGANIZATION
«INSTITUTE FOR PSYCHOLOGICAL AND ECONOMIC RESEARCH»
(INSRO «IPER»)

May 24-June 1, 2024 in Saratov
will be held

**International scientific school for students, undergraduates, graduate students
and young scientists in experimental and behavioral economics**

«PREDICTIVE ANALYTICS IN CONDITIONS OF INFORMATION REDUNDANCY»

This school was created specifically for those who are interested in advanced developments and trends in the field of data collection, processing and analysis within the framework of research into human behavior in the process of making economic decisions with information redundancy.

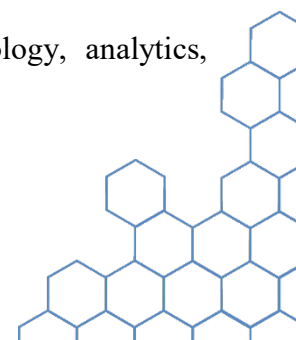

For school participants, master classes, foresight sessions and simulators will be held that will teach various analysis technologies, as well as help to better understand both domestic and foreign experimental schools and methods.

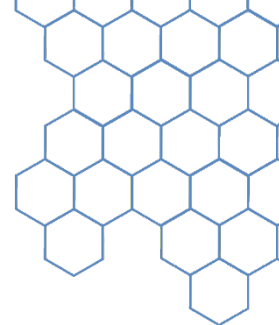

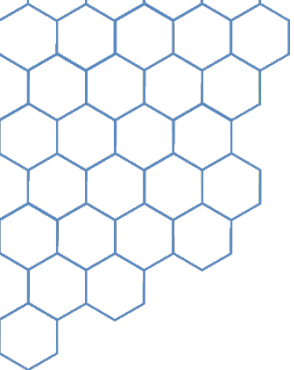

The goals of the scientific school are to:

- ▶ form systematic interdisciplinary thinking in the field of data processing and analysis in conditions of excess information;
- ▶ develop skills in designing experiments and conducting scientific research in the field of behavioral economics;
- ▶ get acquainted with current global trends in the development of behavioral and experimental economics;
- ▶ develop communication between young scientists from different regions and countries;
- ▶ ensure international mobility of young scientists.

In the scientific school program, you will have:

- ✓ MASTER CLASSES AND SPEECHES by scientists and practitioners in the field of behavioral and experimental economics from different parts of the world;
- ✓ ECONOMIC AND PSYCHOLOGICAL SIMULATORS;
- ✓ DEVELOPMENT AND PROTECTION of projects under the guidance of the world's leading behavioral economists and expert analysts;
- ✓ PRESENTATION of new publications in the field of modern methodology, analytics, economic psychology, behavioral and experimental psychology.
